

FRONTLINE ASSET DATA COLLECTOR

'On-the-spot' asset registration, data collection and labelling using a notebook computer

FrontLine Asset Data Collector is a powerful add-on to FrontLine Maintenance Management

It offers a quick and easy way to save time and money – eliminate paper and increase efficiency whilst assuring greater data accuracy

It's invaluable when there are frequent additions to your asset base or when compiling an asset register

Benefits

- Reduced data collection time and complexity
- Standardised data collection
- Accurate data
- Eliminate paper
- Eliminate transcription errors
- Eliminate admin
- Due diligence acceptance and handover of assets
- Complements and enhances FrontLine Maintenance Management
- Easy to use
- Immediate gains with quick payback

“ It saves me so much time and effort - I just couldn't cope without it! ”

Bill Collier, Asset Manager, Salisbury Health Care NHS Trust Hospital

A screenshot of the "Asset Details" software interface. The form contains the following fields: Site Code (MILLBROOK HEALT), Location (MAIN BLOCK), Description (Portable Suction Machine - ICU), Asset Category (APPLIANCE), Maker (THERAPY), Supplier (THERAPY), Servicer (THERAPY), Model (B105420), Serial No (012674988), Quantity (1), Cost (£0.00), Account No (2468-87-20), Date Acquired (14/04/06), Warranty Exp (13/04/08), Register (EQUI), Department (ICU), System (SUCTION), Position (WARD 2), CostCentre (20 01), and CostCode (20-46-01). There are also buttons for Clone, Print, OK, Cancel, and Help. A notes section at the bottom contains three lines of text: "Equipment should be disconnected from mains prior to any cleaning and decontamination procedures.", "The air filter on the equipment should be changed every two months or if visibly contaminated.", and "Before the machine is issued to a new patient, a new accessory kit must be provided."

New assets of any kind need to be registered on acquisition and most have to be checked over before they can be safely and legally used. Whether fixed or moveable, new assets tend to be delivered to their point of use, not the central maintenance facility, so data collection must be carried out on-site where the asset is located. This means a lot of paperwork, data transcription errors and admin; you face the same hassles when compiling an asset register.

With FrontLine Asset Data Collector, you can throw away your clipboard and paper, save valuable time and enjoy an easier life.

Using a notebook computer and portable printer you can – for both new and previously registered assets - collect asset data electronically, record observations and print out identification labels for immediate attachment to equipment. You can record and edit up to 24 asset attributes and add as many Notes as you like to asset details. For fast registration, all lookup tables in FrontLine Maintenance Management are available to use and, for even greater speed, you can clone assets in the field. On returning to the office or workshop, collected asset data can be uploaded effortlessly to the FrontLine Maintenance Management system - job done.

FRONTLINE ASSET DATA COLLECTOR

'On-the-spot' asset registration, data collection and labelling using a notebook computer

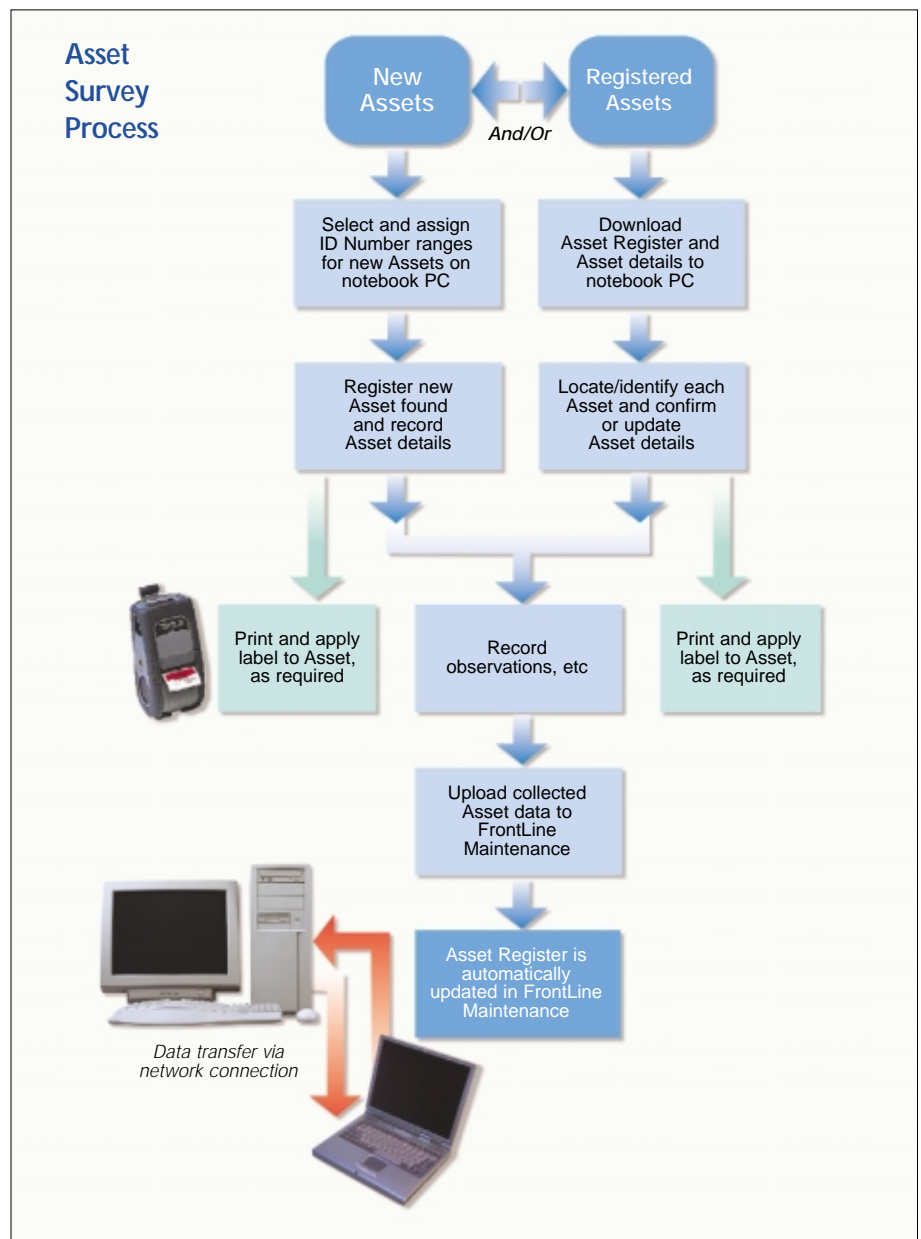

What do you need?

Besides FrontLine Asset Data Collector, you'll need:

- FrontLine Maintenance Management
- FrontLine Data Exchange
- Suitable notebook/laptop PC with network card
- Compatible label printer and bar code scanner, as required
- On-site assistance for installation, commissioning and training

FrontLine Asset Data Collector is ideal when you have a high frequency of new asset additions, for example, in a large equipment-intensive complex like a hospital. It's equally valuable when you're facing the monumental task of collecting data as part of a comprehensive asset registration initiative, such as when implementing a computerised maintenance management system.

When you need a system that accelerates asset data collection, increases data accuracy and delivers a great ROI, FrontLine Asset Data Collector is the tool for you.
