

PIRANA CMMS

- ✓ Maintenance Management
- ✓ Facilities Management
- ✓ Asset Management

Save time and make your life easier. Ensure compliance, improve service levels, reduce downtime

Pirana is an advanced browser-based CMMS (Computerised Maintenance Management System). Delivering mega usability at nano cost, Pirana sets a new standard for price-performance and ease of use.

Pirana's functionality was specified by maintenance professionals from across all sectors of industry. Only features they've endorsed as vital have been included – elements the majority dismissed as unnecessary have been barred. Accordingly, Pirana is a neat, dovetail-fit with the real world needs of maintenance management practitioners.

Compact, simple, fast and powerful, Pirana's the most potent CMMS of its size. Its data storing, organising and reporting capacity is prodigious; its data configuration, search and drill-down capabilities are stunning. Pirana provides all the PM and job

scheduling support and management information needed to secure results and assure success in any organisation – micro, small, medium or large.

Like all the very best tools, Pirana excels in practicality and usability. It's been crafted to fit precisely with the way hands-on users want to work. Pirana's supreme simplicity

guarantees that nothing gets in the way of instant, easy use.

Pirana is all you need to get the job done. CMMS doesn't get easier and has never ever been more affordable. With Pirana, gaining control, implementing good order and ensuring compliance in the workplace is as straightforward as it can ever get.

Moving around is easy

Scheduling is easy

With Pirana you get a lean and mean tool with superb feel and handling – it's solid muscle and no fat

PIRANA

Computerised Maintenance Management System
