

Safety 1st Xpress

Safety 1st Xpress combines the ease of use of earlier versions with modern presentation standards such as tree and tabular view, filtering and drag and drop, to make the most productive PAT and general test software on the market.

Key features include:

- Full template for Portable Appliance Testing
- On-screen graphic display for each reading
- Unique screen presentation for assets
- Use of short codes for key data
- Generate unlimited 'Reader' systems from your licensed system
- Unique keyboard interface
- Download and e-mail capability for remote working
- Unique Journal System
- Configurable to adapt to each client's requirements
- Prints straight from the screen
- Intermediate checks can be any combination of visual and electrical checks
- Batch input of test results
- Group change facility
- Library of downloaded files
- Archiving and retrieval routines

Safety 1st Xpress offers superior functionality in a simple and easy to use system.

Compatible with most popular test instruments including:

- | | |
|--------------|-----------|
| Alphatek | Metrel |
| Edgecumbe | Metrohm |
| Kewtech | Metrotest |
| Martindale | Robin |
| Megger (AVO) | Seaward |

"PAT Testing Software - it doesn't get any easier"
